

LED Street Lighting Program

Our Street Lighting Program offers a wide variety of utility-grade LED outdoor lighting fixtures for parking, roadway, streetscape, and decorative applications.

Benefits of LED Street Lighting

- 30-70 percent less energy consumption than current high-intensity discharged lighting.
- Increased visibility for drivers and pedestrians.
- Improved light uniformity with less shadows and hot spots.
- Superior color impacts (colors more vibrant).
- Lower light depreciation over life of fixture.

How the LED program works

- No up-front charge for equipment and installation other than conduit.
- Customer is billed a Facilities charge and Energy charge separately.
- Facilities charge is a percentage of total project cost as established in Dominion Energy South Carolina's existing tariffs. Facilities Charge remains same for 15 year contract term.
- Energy is billed under Rate 9 (Unmetered Provision) and calculated based on manufactured specified input wattage of the LED light.

Program benefits

- Remote monitoring included with most LED installations.
- Outages communicated wirelessly.
- Faster response time for repair orders.
- Reduces need for customer to call in repairs.
